Glowing Cheeks

How to do it Use soft peach and berry tones to give porcelain skin a wintry glow. After creating a flawless base with Amazing concealer in Ultra Light ($40; ulta.com), Paish swirled peach blush onto the apples of Harris's cheeks to warm up her complexion without making her look tan. Then he stained her lips with a bright berry gloss; the shiny texture kept the color sheer. For the icy sheen on the actress's lids, Paish layered a silver cream stick over white powder shadow. He also lined the bottom inner rims of her eyes with white pencil. The crisp white line brightens eyes and gives this sweet look an edge, says Paish, who added mascara to top lashes only.
